**Dear Parents and Children,**

**Welcome to the District of Emsland.**

This information booklet is intended to optimise your child's/your children's healthcare.

Our key concerns are:

- Recording the current vaccination status of your child with corresponding vaccination recommendations if there are gaps in the vaccination protection
- Determining any possibly existing health problems and finding necessary therapies for your child
- Prompt forwarding of this information to the practitioners in order to ensure and simplify the further medical care

For these purposes, we need your cooperation and help:

- Please read the enclosed information on healthcare and vaccination protection carefully.
- Try to fill out the health questionnaire regarding your child's health status as completely as possible. To do so, please fill out either the version in your native language or the German version.
- In case of difficulties and uncertainties, a free advising service is available on request with assistance of interpreters if necessary.
- Please bring along any existing vaccination documents and records concerning your child's health status (physician's/hospital letters, diagnosis reports on conducted exams, X-ray diagnoses, therapy reports) to an advising appointment or to the first appointment with a registered paediatrician/general practitioner.

If you would like to call us with questions, the "Kindernetz Emsland" can be reached at the phone number 05931-441181.

Kind regards,

Sievering  
Medizinaldirektorin
